

Q3 Product Roadmap August 7th at 2pm Eastern

[Join the adventure](#)

Roads? Where we're going, we don't need roads. But we do need a roadmap and that's exactly what we're sharing.

Our upcoming webinar is for those of you more interested in foresight than hindsight because we'll be looking ahead...to the future!

Product Manager Paul Katcher and Customer Success Engineer Will Patterson will be your guides into the future. Specifically, they'll be sharing all of the product updates coming from Securly this quarter, including:

- Auditor+ Enhancements
- Custom Groups
- UI Refresh
- Category Lookup Tool

By attending the webinar, you'll know why these product updates are more exciting than a Flux Capacitor fluxing.

August 7th at 2pm Eastern
