

Save time

There was a time when on-prem appliances were the fastest tech available for pulling student activity reports. There was also a time when Titanic was a new movie, but things change.

Which is why today is the perfect time to change to a cloud-based solution.

Instead of waiting up to 30 minutes to pull a single report from an appliance, Securly's cloud-based solution delivers results in seconds.

Unlike the appliances of yesterday, Securly delivers unlimited bandwidth and will never crash. Plus, our cloud allows for parent portal capabilities, something no appliance can even offer.

When you are ready for your granular reporting to be accurate, efficient, and fast, click below.
