TRACK DOWN THOSE MISSING CHROMEBOOKS WITH SECURLY.

Start tracking

Life can be rough for Chromebooks. Sometimes they get lost or even (dum-dum-dum) stolen, but that doesn't mean schools can't get them back. With FindMyChromebooks by Securly, it's only a matter of time before they're back home.

Originally designed by TechPilot Labs, recently acquired by Securly, FindMyChromebooks is the best way to track costly school devices without spending a dime.

Easily installed and implemented through the Google Admin Console, these cloud-based tools help admins:

- Maintain school inventory
- Accurately locate devices on a map
- View IP address changes
- Lock screens remotely
- Take screen snapshots of missing devices

Are the Chromebooks hiding on-campus? Laying low near the docks? Skipping town on 59 bus? With FindMyChromebooks by Securly, you'll know exactly where to find your missing devices.

Sign up at FindMyChromebooks.com and begin keeping track of your investments.

Round 'em up

FindMyChromebooks by Securly is accurate, fast, intuitive, and absolutely free.
